incl. recorder & accu
(TXM10-58R)

Additional equipment

Compact Video Rhinoscope/Vaginoscope

■ Suction-/irrigation pump

H140-3S

- Suction & irrigation pump (H140-3)
- 1 li. suction bottle (H160-AB-43)
- 1 li. flushing bottle (H160-AB-7)
- Tubes & transformer
- Sterile filter (AR-10-922)

For lens cleaning, inflation and suction.
For small and large animal practice.

■ NEW! Post rhino video mirror

TA20-3P18

OD: 18mm, WL: 20cm
With soft palate hook

Until now examination of retro pharynx was only possible for clinics and hospitals with appropriate endoscopic equipment. The newly developed video mirror system allows the general practitioners to perform retro pharyngoscopy. Grasping of foreign bodies or biopsies under visual control are possible.

Post rhinoscopy LED mirror system

for cats and dogs

Until now examination of retro pharynx was only possible for clinics and hospitals with appropriate endoscopic equipment. The newly developed deflecting mirror system allows the average practice to perform retro pharyngoscopy. Grasping of foreign bodies or taking biopsies under visual control are possible.

Choanae mirror with LED light, independent of endoscopes

E-24-LE-SET Post rhinoscopy LED set consisting of:

- E-24-LE Light carrier
- E-24-21 Choanae mirror
